

NEW PRODUCT ANNOUNCEMENT

INTRODUCING JAX DREDGE-GUARD 1 AND 2

Developed for heavy-duty, high load and high-contamination applications, JAX Dredge-Guard resists pounding out and “stays put” significantly better than any other heavy equipment grease. Extensively field tested, JAX Dredge-Guard outperforms industry greases currently used in off-highway construction, trucking and dredging operations.

JAX Dredge-Guard outperforms greases currently on the market in all of these critical areas:

- Resistance to water wash-out
- High load-carrying protection
- Extreme-pressure and antiwear characteristics
- Good mobility and pumpability

This product replaces Magna-Plate 800-1 and 800-2.

If you are currently using JAX Magna-Plate 800-1 or 800-2, or are interested in learning more about the exceptional performance of JAX Dredge-Guard series greases, contact your JAX representative or call 1-800-782-8850.
