

PRODUCT ANNOUNCEMENT

ATTENTION ALL JAX SYNCOMP-FG USERS:

JAX SYNCOMP-FG IS NOW COMPRESYN® 405

Over the past few months, JAX has unveiled Compresyn®, a brand new line of synthetic compressor oils. In addition to all-new offerings, the Compresyn® line will now incorporate all Syncomp-FG products including Syncomp-FG ISO 46, 68, and 100. These products will now be available under the names Compresyn® 405 ISO 46, 68 and 100.

Despite the change in name, the formulation and pricing for Compresyn® 405 are identical to those of the outgoing Syncomp-FG line. Compresyn® 405 is manufactured using the same NSF H1-registered PAO base fluids and performance-driven additives in order to maintain the same excellent level of performance in compressor applications including flooded-screw compressors, vacuum pumps, refrigerator compressors, and other mineral oil-lubricated systems.

JAX stands behind this product under its new name and is confident that the Compresyn® 405 line of compressor oils will meet or exceed all the requirements of both new and existing applications.
